-------------------	----

# Canopies

A wide range of factory made & fully assembled flat, open, and closed duo-pitched, single double mono-pitch models are available in a wide variety of styles and colours.

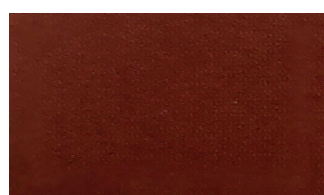

# DUO CANOPIES

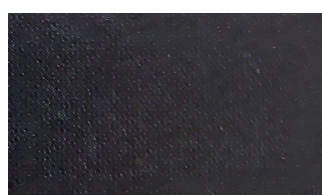

Our GRP Duo door canopies add lasting benefits to the home. Uncomplicated to install and constructed in lightweight, long-lasting, virtually maintenance-free composites, which instantly transforms an entrance to any residence.

## GRP Roof Colours:

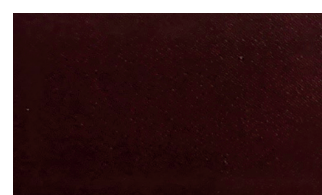

\*Our Grp Roofs come in 3 standard Colours:

Terracotta (RAL 8004)

Slate Grey (BS 00A13)

Dark Brown (RAL 8017)

White Base (RAL 9016)

- In addition to the standard colours shown, we can provide products to any BS or RAL colour.
- UV stabilisers are added to the gel coat finishes to minimise colour degradation.
- Colour fastness figures are available on request.

\*Please Note: Actual Colours May Vary Due To Printing

Let Your Imagination  
Run Wild...The Sky Is The Limit!

BESPOKE CANOPIES

GRP-Products have multiple years of knowledge in Glass Reinforced Polymer and invested considerable time designing and constructing GRP Canopies that work with extensive varieties of home styles across the UK.

Like other diverse art forms, architecture is developing and making constant changes. From building usage to materials used, conventional architecture is constantly advancing and will continue to do so into the future.

Because of this, we have designed our Canopies and accessories to interact with each other. Allowing for changes in architectural style means that our products will always suit a home and add to its overall appearance.

# GLASS CANOPIES

Our range of Glass Door Canopies use toughened safety glass and high quality Stainless Steel fixings to provide a visually stunning addition to any building. Glass is a surprisingly versatile material its slim profile, toughness and weather resistance make it a popular choice.

Every glass door canopy model is designed and manufactured in the UK. You can expect the highest quality materials and exceptional levels of finishing of structural components and glass fixings when buying from us.

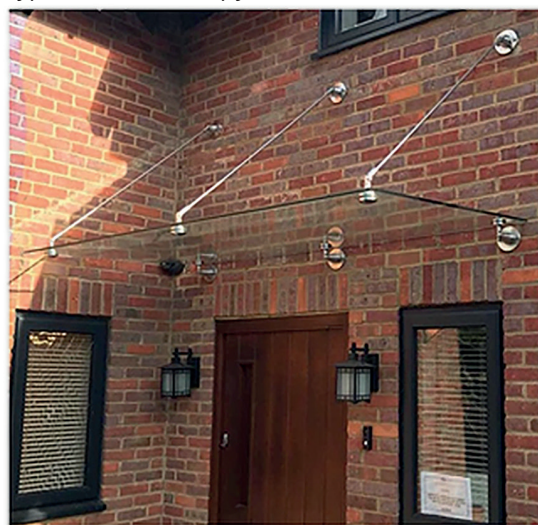

## STANDARD SIZE CANOPIES

Each Glass Door Canopy comes in a range of sizes which are designed to accommodate a wide range of entrance door sizes from single front doors to sliding and bi-fold doors.

## BESPOKE CANOPIES

Where a standard size will not suit your application we can produce bespoke sizes.

Type: P Glass Canopy

Type: M Glass Canopy

# POLYCARBONATE CANOPIES

**Our range of polycarbonate door canopies are easy to fit and long lasting. Polycarbonate is a useful alternative to glass when looking for a transparent door canopy material.**

Polycarbonate is highly resistant to shattering (subject to it being a suitable thickness) and is also flexible which allows some designs to feature curves.

We only ever use UV stable Polycarbonate which will not discolour in sunlight.

## Canopies To Suit You & Your Home

Each Polycarbonate Door Canopy comes in a range of sizes which are designed to accommodate a wide range of entrance door sizes from single front doors to sliding and bi-fold doors.

Where a standard size will not suit your application we can produce bespoke sizes.

Type: F Polycarbonate Canopy

# Architectural Features

GRP Architectural features add an unforgettable, and prominent presence to any home. We Design & Manufacture all of our Architectural Components in the UK to a faultless standard that lasts forever.

# ARCHITECTURAL FEATURES

## DOOR SURROUNDS

We offer a Classic Range of GRP Door Surrounds; all are High Quality & Low Maintenance Products.

Georgian & Victorian are examples of a much larger group of period styles, and with an extensive assortment of sizes, they are the perfect addition to enhance the entrance to your property.

## DOVE COTES

Amongst our extensive range of architectural products, we have two GRP Dovecote Roof Towers in both a Georgian & Victorian design, both have a concave replica lead effect roof and authentic white louvred body.

Manufactured from Lightweight, Long Lasting & Low Maintenance GRP Material, they are ideal for both refurbishment and new build projects, and are delivered finished and ready to install.

## PORTICO'S

We offer an extensive range of GRP Portico's and Porches for both new build and refurbishment projects. Both Standard and Bespoke solutions are available with all products being lightweight, long-lasting and virtually maintenance-free.

Why not consider including our popular 'Stone Coat' Stone Effect Finish given its authenticity and likeness to the real thing.

# ARCHITECTURAL FEATURES

## COLUMNS

GRP Products manufacture door entry columns and pillars which are strong, lightweight, and simple to manage and install.

GRP columns can be filled with steel supports and concrete to creating a load bearing, realistic feeling & maintenance free concrete column.

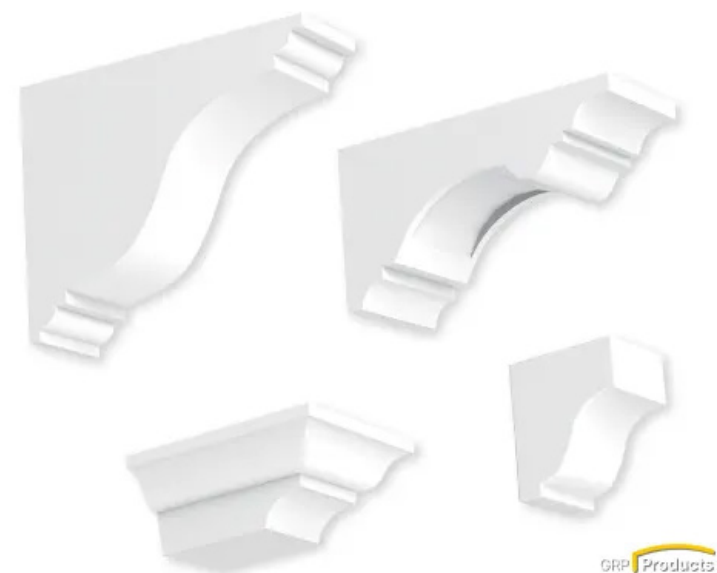

Columns can be used in corporation with our canopies to create a timeless classic entrance, and are available in Plain & Fluted Finish .

## DENTILS

Our Lightweight, Low Maintenance GRP Dentil Features are an ideal way to add class to any plain Soffit details.

We have a vast range of sizes and designs to suit all applications and are delivered finished and ready to install.

## STONE-COAT

Mouldings can be manufactured in any profile, shape and colour, from the more complex shapes of columns and balustrades to a simple band course, Stone-Coat offers you total design flexibility.

# STONE-COAT

Lightweight | Durable | Moulds

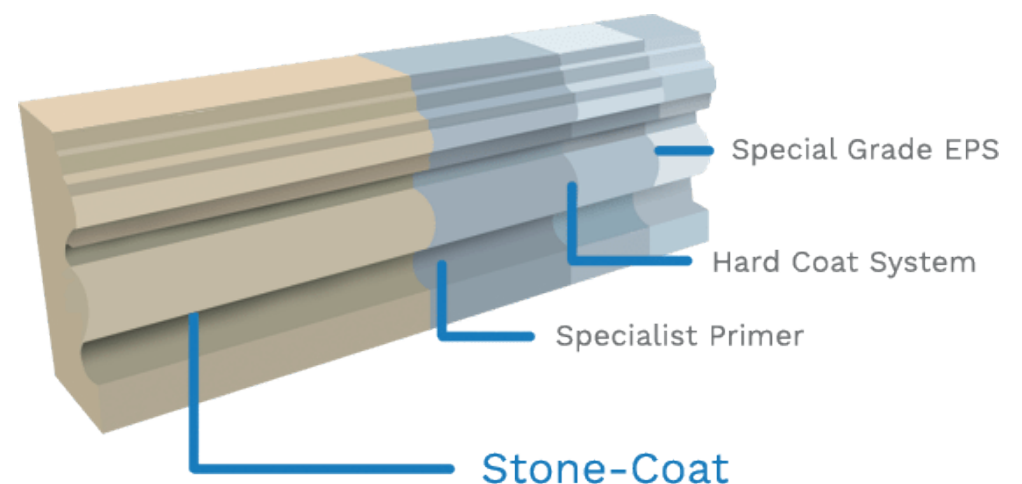

## TAKING WEIGHT OFF DETAILING

Stone-Coat mouldings can be made to suit any profile. If it can be drawn and detailed, we can make it. Coping stones, door surrounds, cills, heads, keystones and dentils are all options that can be included when specifying Stone-Coat mouldings.

From the more complex shapes of columns and balustrades to a simple band course, Stone-Coat offers you total design flexibility.

Mouldings can be manufactured in any profile, shape and colour. A unique stone effect product that solves the weight issues of traditional cast stone meets the requirements of the Health & Safety Executive and allows the designer complete flexibility. It not only looks great but offers a cost-effective option against more traditional alternatives.

Stone-Coat architectural decorative products will enhance the appearance of your home at a very reasonable cost. Whether it be a new build or refurbishment, the addition of stone-Coat mouldings will give your residential property a unique visual appearance.

Stone-Coat also offers a perfect solution for the design and use on commercial projects. We can provide a complete range of architectural shapes to suit any specification. From a simple coping to a more detailed cornice or decorative band course.

# GRP Chimneys

GRP Products chimneys come in a breadth of sizes and options, to guarantee they are as impressive as your development. Our Chimney Solutions are based on a ready-to-install, one-piece chimney stack.

# GRP CHIMNEYS

Lite-Stack | Light-Weight | Light-Solutions

Our GRP chimney range offers contractors a practical, long-lasting, and maintenance-free option for chimney construction. Our skilled team can replicate any Brick, Stone or Render Finish in GRP

Lightweight and easy to use, the chimney is simply lifted into position, bolted onto the roof trusses and leaded in the standard way. These chimneys can be positioned on the Gable End, along the Ridge or Mono pitched.

## Venting & Pots

All Chimneys can be manufactured to accept a Flue System and can be supplied with an approved gas terminal and suitable flue pipe.

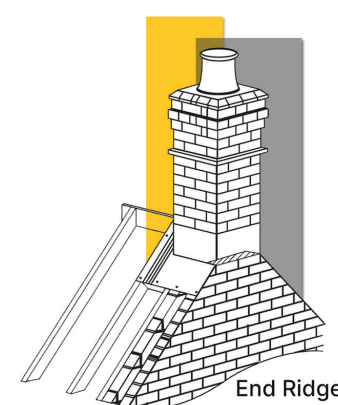

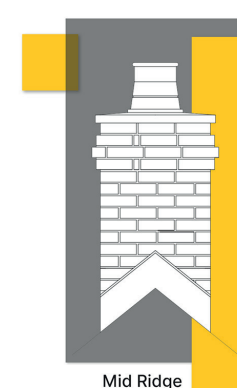

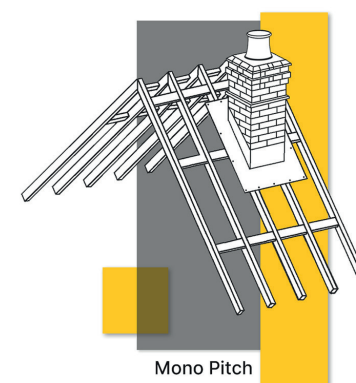

Chimney Pots can be mixed & matched to suit the style & size of the desired chimney. Pots are available in a terracotta, buff or black finish

## Brick Slip Chimneys

GRP Products' genuine brick slip chimneys deliver a cost-effective and time-saving method of adding a chimney to a property. The chimneys are lightweight, straightforward to fit and use slips cut from the bricks used to build the property, meaning that they are an identical match to the main structure.

Our brick slip chimneys are constructed in one piece and manufactured using a GRP core, allowing 25mm brick slips to be fixed to the surface and rendered using the same mortar as the building.

Joints are left open so that they can be pointed on site using the same mortar as used on all the other brickwork.

### IMPORTANT NOTICE

TV Aerials, Satalilite dishes or any similar items must not be fitted to Litestack Chimneys. Doing so will invalidate the products warranty

## Our Services

We design and manufacture high quality composite GRP door canopies suitable for all types of properties on a supply only basis. You'll find our extensive GRP door canopy range offers something for everyone, from bespoke one off pieces to multiple units for housing developments.

Whatever your door canopy needs, you can be assured of great value and fast delivery. Each member of our customer service team has extensive product knowledge, backed with a friendly helpful approach. We Manufacture high quality, low maintenance GRP products for both the new build and refurbishment market

Recycling Collection

## About GRP

GRP stands for Glass Reinforced Plastic (or Polymer) or even as Fibreglass. It is a matrix of recycled plastic and recycled glass with a tough waterproof resin to bond it all together.

Fibreglass is an immensely versatile material due to its lightweight, inherent strength, weather-resistant finish and variety of surface textures. Advanced manufacturing techniques such as pre-pregs and fibre rovings extend fibreglass's applications and the tensile strength possible with fibre-reinforced plastics.

Trailer Bodies

## Endless Possibilities

More affordable and more flexible than carbon fibre, GRP is stronger than many metals by weight; it's non-magnetic, non-conductive, transparent to electromagnetic radiation, can be molded into complicated shapes, and is chemically inert under many circumstances.

Extraction Fans

Battle Tanks - Paint Ball
